Medical Eponyms for the Palm OS
Version 1.85

July 25, 2006
Andrew J. Yee, MD
yee@post.harvard.edu
http://eponyms.net

There are two files that require installation

1. Eponyms.prc
2. EponymsDB.pdb

Please hot sync both files to your Palm device.

For Tungsten T3 users only

For Tungsten T3 users, in order to take advantage of the Dynamic Input area, you can download the AppSlipRotate and StatusBarLib files from http://eponyms.net. *Note that if these are installed on the Tungsten T5 or other Palm device, this may cause a fatal error requiring a hard reset!*

Comments and suggestions

Please feel free to contact me with any questions or comments or suggestions for new eponyms at *yee@post.harvard.edu*.

Acknowledgements

Special thanks to Dr. Mathias Tschopp, author of MedCalc (http://www.med-ia.ch/medcalc/), who has continued to graciously convert the database to a stand-alone Palm OS program since 2002.
