Reporting Bugs

If you find a bug in our software, it would be helpful if you reported the bug to us. To report a bug, please e-mail us with Bug Report Request in the subject line. In your e-mail, include the following information:

What type of PalmPilot you are using (i.e. Personal).

The software name and version number (i.e. Amoebas 1.21).

The error number and the exact contents of the error message.

A brief description of how we can recreate the error.

Your name and e-mail address so we can contact you when the bug is fixed.

It is best to report bugs by Email, so that the programmers have a written record of the information they need to solve the problem. As soon as we receive your Email, we will examine the problem, and fix it. Because our programmers are busy, creating software, it can take a while for them to reply, but they will release a new version of the software that fixes the bug as soon as they can.

Play Amoebas

You control a little boy moving on the playing field. He has to kill all the amoebas and to gather all the bonuses, if it is possible. You have three lives and three bullets at the beginning of each level. In order to load, you have to find a box with bullets. A box of bullets contains three bullets. You can have maximum six bullets at a time. If the boy is caught by the amoebas or hit with infectious bullet from an amoeba, he dies and you lose one of your lives. You can either shoot at the amoebas or press them down with the weights.

The objects in the game

Each level has its own map, containing differently situated objects.

The bonuses are fixed on the playing field. There is a certain number of bonuses for each level. Take them, they will increase your points .

The boxes with the bullets are fixed on the playing field and there is a certain number of them for each level. Get all of them, these are your much-needed munitions.
