

# aStopWatch - an elegant stopwatch application

## ■ Features

- Shows time with the **big LED** style digits.
- Enables you to **use the application buttons (hard buttons) to operate the most stopwatch functions**. For example, set timer time, start/stop stopwatch.
- Enables you to **record the current time by directly tapping the digits**.
- Enables you to **export the time log to the Memo Pad**.
- With **accuracy up to 0.01** of a second.
- Not only shows **time per lap**. **aStopWatch** can also show **speed per lap**.
- Supports Hi-Res (**320x320**).
- **aStopWatch** is a plug-in tool of **aClock**. You can directly invoke this application from **aClock**.
- Supports the **memory expansion (SD)** card. You can store the **aStopWatch** main program on the expansion card for saving the main memory.
- Last but not least, color is also supported by **aStopWatch**.

## ■ User's Manual

---

### How to invoke aStopWatch

---

**aStopWatch** is a plug-in tool of **aClock**. Before using **aStopWatch**, you have to install **aClock** into your Palm. To get the information about **aClock**, please visit <http://www.a0soft.com>. Once you have installed **aClock**, you can then invoke **aStopWatch** from the **aClock** main window as shown below. You can tap the return icon or the **Return to aClock** menu item for returning back to the **aClock** application.

If the **aStopWatch** main program is stored on the memory expansion card (SD card), **aClock** will import this program into the main memory if you invoke **aStopWatch** from **aClock**. This copied main program won't be deleted from the main memory until it returns back to the **aClock** application.

If you run **aStopWatch** on the hires (320x320) or hires+ (320x480) device that runs on OS v5.0 or later, **aStopWatch** shows the enhanced LED as shown below.

---

### Start Your Stopwatch

---

To start the stopwatch, you can tap the **[Play]** or press the first application button.

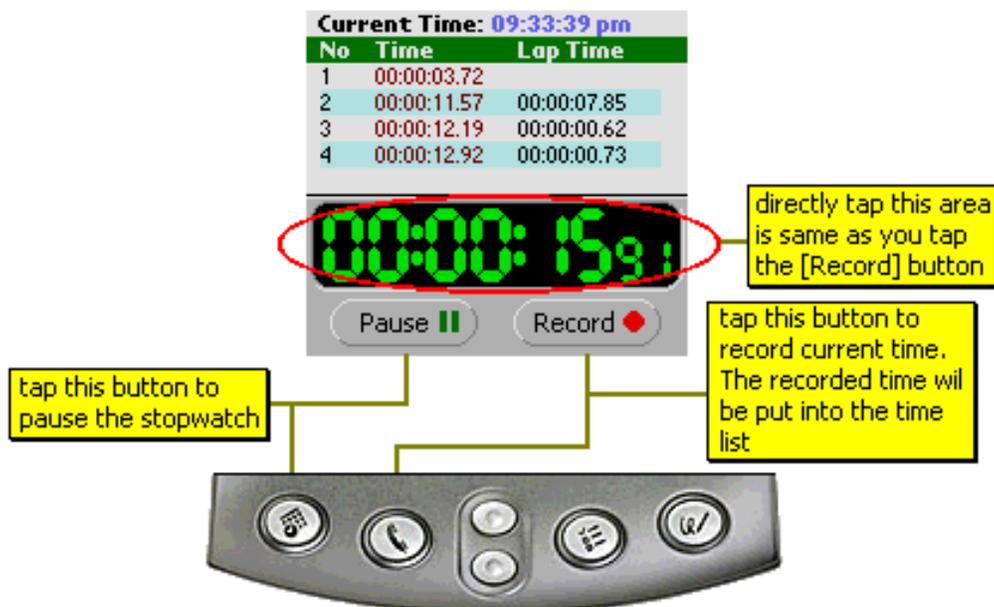

## Stop Mode:

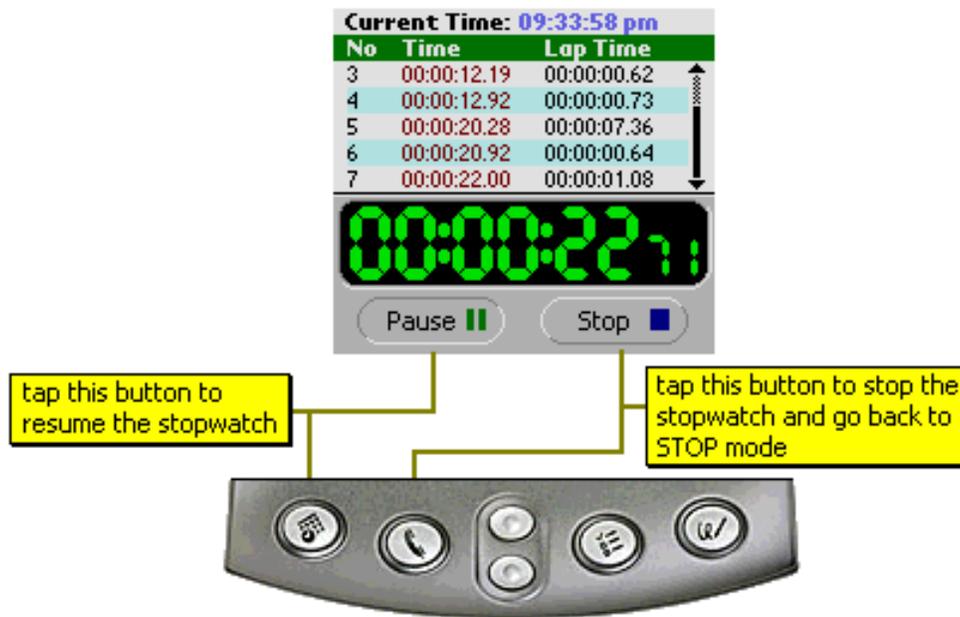

## Play Mode:

When **aStopWatch** is counting, you can use the pause function to pause the counting. If you only want to record the current time and without stopping the counting, you can use the record function.

To stop the stopwatch, you have to press the **[Pause]** button for entering the PAUSE mode, and then pressing the **[Stop]** button.

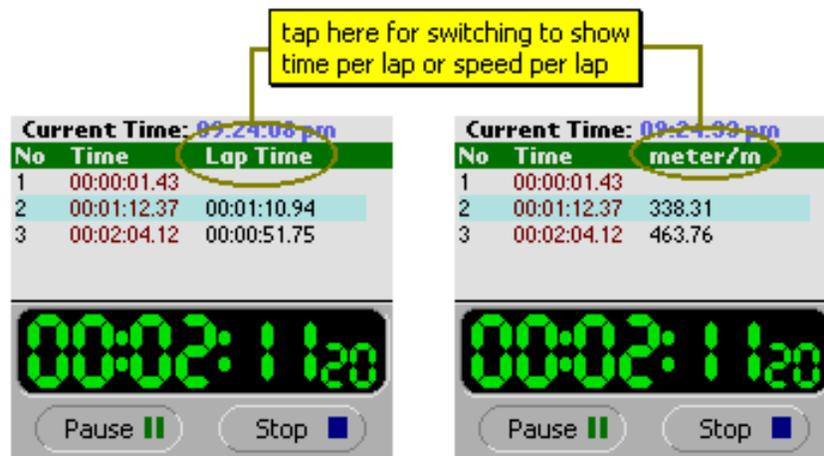

## Pause Mode:

## Show lap time or speed per lap

**aStopWatch** not only shows you the time per lap but also the speed per lap. You can tap the "Lap Time" field for switching this as shown below.

You can customize the speed format via the Preferences form.

## Export the time log to the Memo Pad

Once you have recorded the times, you can export this time list to the Memo Pad by the **Options -> Send list to Memo** command.

1. Start the Palm Install Tool application in your Palm directory or folder.
2. Choose the correct User Name.
3. Choose the proper aStopWatch main program (**aStopWatchxxx.prc**) file that accompanies the downloaded ZIP file.
4. HotSync.

**aStopWatch** is ready to go. Tap on the Applications button on your PalmPilot and then tap on the icon to invoke **aClock**. Then, you can invoke **aStopWatch** by tapping the tool icon of **aClock**.

For some Palm types, you may also need to use the "Soft Reset" function to reset your Palm after HotSync has completed to make sure the installed program works.

**aStopWatch.prc**: **aStopWatch** main program file. It supports the Palm that screen size is 160x160. If your Palm's screen size is 160x160 (e.g. Vx, m10x, m500, Zire, m505, m515, m130), please install this file.

**aStopWatch-16bit-320.prc**: **aStopWatch** main program file. It supports the Palm that runs on OS 5.0 which screen size is 320x320/320x480/480x320, and it has 65536 or above colors. If your Palm's screen size is 320x320/320x480/480x320 and it's color enabled (e.g. Tungsten T/W/C/T3, Zire 71, PEG-NX60/70V, PEG-UX40/50), please install this file.

The following table shows the details.

device	Vx, m10x, m500, Zire,m505, m515, m130 Screen size: 160x160 Display: Monochrome/color	Tungsten T/W/C/T3, Zire 71, PEG -UX40/50 Screen size: 320x320, 320x480, 480x320 Display: 65536 colors
main program		
<b>aStopWatch.prc</b>	<b>Yes (best)</b>	<b>Yes</b>
<b>aStopWatch-16bit-320.prc</b>	no	<b>Yes (best)</b>

**aStopWatch** is a plug-in tool of **aClock**. To use it, you have first to install **aClock**. To get the information regarding **aClock**, please visit <http://www.a0soft.com>.

---

**How to install aStopWatch on the memory expansion card**

If your device has a memory expansion card (Palm, Sony, Handspring), you can install **aStopWatch** main program there for saving the main memory. Once you have installed **aStopWatch** into the main memory, you can then use a file management tool like [FileZ \(http://www.nosleep.net\)](http://www.nosleep.net) to move the aTimer.prc file from the main memory into the `/PALM/Programs/A0Soft` directory.

## ■ Removing aStopWatch

If you find that you no longer need **aStopWatch** (or are trying to conserve memory), removing it from your Palm is quite simple. From the Applications launcher :

1. Tap the Menu icon
2. Go to the App menu and choose Delete
3. Select the **aStopWatch** and tap '**Delete...**'
4. At this point you will be asked to confirm your request
5. To do so, tap '**Yes**'. To return to the application launcher tap '**Done**' and confirm that the **aClock** application no longer appears.
